Message To The Members:

Having completed its 31st year of operation, I am delighted to report that the Central Region School Insurance Group continued to deliver stable and cost effective insurance protection for its 34 school members in Stanislaus and Merced counties. Congratulations are due to each member for their unwavering efforts to manage risks and control costs throughout the tenuous economic turmoil faced by public education today.

During 2010/11, CRSIG medical program members found themselves tossed about by the various waves of a national healthcare crisis including employer funding requirements out of federal COBRA legislation and healthcare reform legislation attempts to impact medical costs that have spiraled out of control. CRSIG continued to utilize collaboration platforms built with individual employees, union representatives, key school HR representatives and school administrators to maneuver its way through the crisis. By the end of the 2010/11 year, all factions had reduced the 2012 renewal options from 5 possibilities to 2 for a September 2011 decision. This process was a truly incredible witness to the importance school employees place in working together to develop a "best for all" solution in difficult times. It is also one of the many reasons I am honored to work for the members of this JPA.

The Workers' Compensation program again exceeded all expectations for the year in that the frequency of claims continued to decrease with average claims costs rising slightly, primarily due to medical inflation. In addition, the Return To Work Program revealed that the prior 2 years ending December 2010 resulted in fully duty releases for 86% of the injured employees within 25 days of modified duty assignments. The remaining 8% of restricted employees that were extended for surgeries and difficult recoveries, returned to full duty on average within 65 days. The last 6% of employees who were taken off work for multiple reasons after the 60 day mark returned to full duty on average within 73 days.

Loss Control services to members continued to grow dramatically as members took advantage of employee trainings, regulatory program plan implementations and specific hazard identification services.

Finally, I encourage you to visit the CRSIG website at www.crsig.com which includes specific information on each of the programs, forms, meeting schedules and helpful links to other school-related agencies and organizations. Thank you to each of the CRSIG members, its Executive Board, staff and business partners for your efforts, commitment, and support to CRSIG.

Sincerely,
Becky Slaughter, ARM

In October of 2007, CRSIG established a policy for monitoring fund balances above and below specified targeted equity levels. The purpose of the target is to ensure that each program is funded at an ultra-conservative level to avoid future assessments and provide security around the issuance of any rebates or dividends.

Program Highlights

The 2010/11 year not only brought a relentless continuation of the economic crisis at the state and national levels, it revealed severe conditions globally as well. The severe fiscal impact on local schools was taken very seriously by CRSIG and every effort was made to release funds from the self-insured programs where feasible while keeping rates at levels that accurately reflect costs.

Property & Liability: On July 1, 2010, rates were raised 1% overall while ADA remained stable and TIVs increased by \$45 million. Property losses improved and CRSIG continued to experience an upward swing in liability costs although the trend continued at a slower pace than previous years. CRSIG launched its first CRSIG-Wide comprehensive site inspection program where members received recommendations for each identified safety item on a priority correction basis; Priority #1: Life Safety, Priority #2: Serious Liability and Priority #3: General Hazard. In addition, CRSIG published its first Risk Management Manual for dissemination to all site administrators at each member district on an annual basis.

Workers' Compensation: On July 1, 2010, rates were increased 3.2% overall as a result of a total payroll decrease of (\$30.3 million) combined with a drop in claims costs of almost \$250,000. CRSIG was again able to realize continued savings from the reform efforts as the expected deterioration via legislation did not occur. In addition, the continued downward trends in frequency and severity coupled with the introduction of claim resolutions using mediations provided significant savings. CRSIG was also able to release reserves from the program for the third year in a row based on the CRSIG Target Equity Policy.

Medical: January 1, 2011 brought a 9.9% increase to Kaiser HMO rates, 9.9% increase to Kaiser HDHP rates, 31.13% increase to PacifiCare HMO rates and a 21.98% increase to United HealthCare HDHP rates. Employers and employees alike found themselves at the epicenter of the Health Care crisis coupled with a significant number of catastrophic claims.

Vision: January 1, 2011 revealed the ability for CRSIG to make no changes to rates for the seventh year and release a portion of the program reserves to members based on the CRSIG Target Equity Policy.

Dental: On January 1, 2011, rates were increased by 10% in response to increasing claims costs that still remained below the 12% industry trend. The 2011 year brought the final adjustments to bring rates to the level that fully supports the costs and an end to the reduction of excess reserves via premium credits. This brought the dental pool to a position where fund equity will be managed based upon the CRSIG Target Equity policy.

2010/11 Objectives

Each year, the CRSIG Executive Committee develops objectives for each program at its annual retreat. The Executive Committee oversees the accomplishment of the objectives throughout the year.
