

Please check your records. The certification is good for three years – if you have someone with an expiring certification within the next 6 months – please send them to this classroom session.

AERIAL LIFT OPERATOR CERTIFICATION

March 29, 2018
9:00 am to 11:00 am

Location: Merced County Office of Education
Clark Room
632 W. 13th St.
Merced, CA 95341

You must attend the classroom portion in order to qualify for certification.

For employees attending the class, after you pass the classroom portion, the trainer will set up a time to visit your site and observe your operation of the aerial lift. The lift must be in good operating condition and must be available for use.

- Aerial lifts include scissor lifts, man lifts, boom lifts (truck mounted and/or trailer mounted), platform lifts, or other type of man lift system.
- There are specific requirements for each type of these aerial personnel lifts.
- These are NOT forklifts – but are specifically designed to handle humans working at elevated levels.
- **This is not a basic training class – remember you must be a qualified operator – this is a certification class. If you have never operated a lift before, you may still attend the class, however there WILL be limitations on the certification process.**
- The certification is good for 3 years and satisfies OSHA requirements.

Please be prepared to provide the name and phone number of the supervisor and the type of lift to be operated (Type and model #)

Space is limited -- So, reserve your space now!
